SCHOLARSHIP OBJECTIVE & ACADEMIC PROFILE

Dedicated and high-achieving student seeking admission and financial scholarship for a **B.Sc. in Computer Science & Engineering**. Currently specializing in Artificial Intelligence and Machine Learning through practical Python development and algorithm design at Phitron. Passionate about leveraging strong academic background and technical problem-solving skills to contribute effectively to university research and innovation.

EDUCATION & TECHNICAL TRAINING

Phitron – Artificial Intelligence & Machine Learning Program

Present

Specialized Coursework: phitron.io/ai-ml-course

Focused Skills: Python Programming, Data Analysis (NumPy, Pandas), Machine Learning (Scikit-learn), Data Preprocessing & Model Evaluation

Higher Secondary Certificate (HSC)

2024

Secondary School Certificate (SSC)

2022

Science Group | GPA: 3.92

Science Group | GPA: 3.78

TECHNICAL SKILLS

Languages: Python

Data Science: NumPy, Pandas, Matplotlib

Machine Learning: Scikit-learn, Regression, Classification, Support Vector Machines (SVM), PCA, XGBoost

Developer Tools: VS Code, Jupyter Notebook, Anaconda, Git, GitHub

SELECTED PROJECTS

House Price Prediction Model | Python, Scikit-learn, Random Forest

- Developed a predictive machine learning model with feature preprocessing and Random Forest Regression to estimate property values.

iPhone Price Prediction | Python, Pandas, Regression

- Engineered data cleaning pipelines and applied regression models on Kaggle datasets to analyze price trends.

KEY ACADEMIC STRENGTHS

- Proactive Learner:** Strong capacity for independent technical study and practical implementation of complex algorithms.
- Analytical Mindset:** Solid mathematical and logical foundation focused on practical problem-solving.
- Commitment to Excellence:** Highly disciplined approach toward academic performance and continuous skill growth.
